

ICAR Tripura Centre organized training on fruit plant propagation

ICAR Tripura Centre, Lembucherra, organized training on fruit plant propagation from 3rd-5th July, 2018, sponsored by Central Institute of Horticulture, Ministry of agriculture and farmers welfare, Govt. of India. Hands on training on different basic and advanced methods and techniques of tropical fruit plant propagation were imparted by the training organizers Dr. Biswajit Das, Principal Scientist and Dr. H. Lembisana Devi, Scientist, along with other experts to the unemployed youths attended the training from all the districts of the state. Scientific management practices of nurseries and mother orchards of mango, litchi, jackfruit, mosambi, pineapple and some important minor fruits were also demonstrated. Dr. M. Datta, Principal, College of agriculture, Govt. of Tripura, was the Chief guest in the valedictory function on 5th July who advised the trainees to practice the propagation techniques so that they can become skilled fruit plant propagators. Mr Soumitra Das, Joint Director, HRC, Directorate of Horticulture, Govt. of Tripura, Nagicherra, told about departmental procedures and nursery registration act for establishment of commercial fruit nursery. Dr. K. K. Barman, Joint Director, ICAR Tripura Centre, advised the trainees to establish fruit nursery of popular fruit crops in their areas for higher income. Certificates were distributed to the trainees for successfully completing the training.
