

Celebration of World Environment Day

The ICARNEH Tripura Centre celebrated the World Environment Day on 05 June 2018. All the staff members including Joint Director, scientists, technical, administrative and supporting staff took part in the occasion. At the outset the Dr. Basant Kandpal, Joint Director, urged everyone to avoid using plastics as far as possible in day to day life. He also emphasized that, not only in the office premises or at homes, a good citizen should encourage others also to put the biodegradable and non-biodegradable wastes separately in the designated dumping places. This would greatly help the concerned civic agencies to keep our environment clean and healthy. To mark the occasion, the staff members offered their services to develop a waste land in the centre's premises by removing the obnoxious weeds, plastics, etc. followed by planting fodder crops. The programme was coordinated by Dr. K.K. Barman, Principal Scientist.
